

Project: Decker Avenue Townhomes

Location: Baltimore, MD

Contractor: Shivani Investments

Project Manager: Mike Patel

Project Start: June 2003

Project Finish: July 2004

Project Detail:

This project was built in the inner city of Baltimore to replace older structures. This townhome project is four living units. They are three stories in addition to a basement. Each townhome has three bedrooms, three and one half baths. The structures are all brick, they feature a drive under garage and offer a den in the basement.

Project Highlights:

- All brick structure
- Three stories on a basement
- In fill housing in an older area revitalization
- 1894 sq. ft. per living unit
